HSC   May 2017

PROJECTS

Pet Cure Web Application | (**Link**)
A platform for managing pet services.   January 2025
- Developed a pet care platform using **Java**, **Spring Boot**, **React.js**, and **MySQL** for multi-role service management.
- Implemented **microservices architecture** to enhance scalability, modularity, and independent service deployment.
- Built custom dashboards for each user role, reducing operational complexity and improving overall usability.
- Ensured secure authentication, **responsive UI**, and efficient **RESTful API** integration, increasing system security**.**

Ayurvedic Clinic Management System | (Mini Project)
A healthcare platform for streamlining clinic operations.
- Built a clinic management system with **Java**, **Spring Boot**, and **React.js** to reduce patient wait time.   August 2024
- Implemented role-based access for doctors, receptionists, and admin resulting in accuracy.
- Developed **REST APIs** with **MySQL** for data handling reducing appointment scheduling errors.

TECHNICAL SKILLS

- **Languages:** Java, .Net, JavaScript, C, C++, MySQL
- **Developer Tools:** VS Code, Eclipse, IntelliJ IDE, Visual Studio, MySQL Workbench
- **OS:** Windows, Linux
- **Technologies/Frameworks:** Spring, Spring Boot, Node JS, MySQL, Hibernate, Entity Framework, Dot Net, ReactJS, Redux, Git, GitHub, Bootstrap, Material Ui

EXTRA CURRICULAR ACTIVITES

- Blood donations in social initiatives contributing to life-saving causes.
- NSS Volunteer: Actively participated in community outreach and sanitation programs under the national service scheme.
